# 1. Precautions

Follow these safety, servicing and ESD precautions to prevent damage and protect against potential hazards such as electrical shock and X-rays.

## 1-1 Safety Precautions

1. Be sure that all of the built-in protective devices are replaced.
2. When reinstalling the chassis and its assemblies, be sure to restore all protective devices, including control knobs and compartment covers.
3. Make sure that there are no cabinet openings through which people--particularly children--might insert fingers and contact dangerous voltages. Such openings include the spacing between the picture tube and the cabinet mask, excessively wide cabinet ventilation slots, and improperly fitted back covers.
4. Design Alteration Warning:  
Never alter or add to the mechanical or electrical design of the unit. Example: Do not add auxiliary audio or video connectors. Such alterations might create a safety hazard. Also, any design changes or additions will void the manufacturer's warranty.
5. Leakage Current Hot Check (Figure 1-1):  
Warning: Do not use an isolation transformer during this test. Use a leakage-current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, *Leakage Current for Appliances*), and Underwriters Laboratories (UL Publication UL1410, 59.7).

With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, etc.) and all exposed metal parts. Examples: Handle brackets, metal cabinets, screwheads and control shafts. The current measured should not exceed 0.5 milliamp. Reverse the power-plug prongs in the AC outlet and repeat.

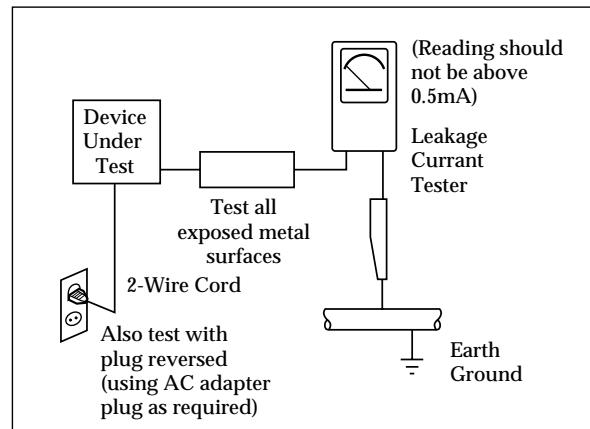

Fig. 1-1 AC Leakage Test

6. Insulation Resistance Cold Check:  
(1) With the unit's AC plug disconnected from the AC source, connect an electrical jumper across the two AC prongs. (2) Set the power switch to ON. (3) Measure the resistance between the shorted AC plug and any exposed metallic parts. Example: Screwheads, antenna, control shafts or handle brackets.

If any of the exposed metallic parts has a return path to the chassis, the measured resistance should be between 1 and 5.2 megohms. If there is no return path, the measured resistance should be "infinite." If the resistance is outside these limits, a shock hazard might exist. See Figure 1-2

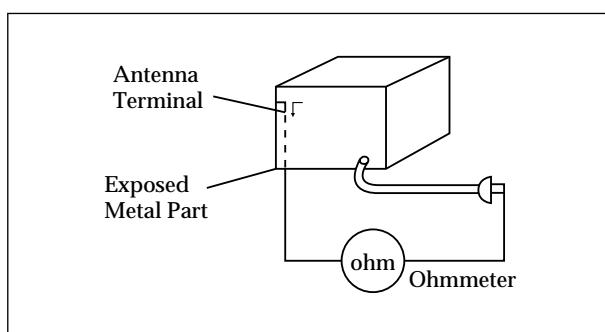

Fig. 1-2 Insulation Resistance Test

## 1-1 Safety Precautions (Continued)

---

7. Components, parts and wiring that appear to have overheated or that are otherwise damaged should be replaced with parts that meet the original specifications. Always determine the cause of damage or overheating, and correct any potential hazards
8. Observe the original lead dress, especially near the following areas: Antenna wiring, sharp edges, and especially the AC and high voltage power supplies. Always inspect for pinched, out-of-place, or frayed wiring. Do not change the spacing between components and the printed circuit board. Check the AC power cord for damage. Make sure that no wires or components touch thermally hot parts.
9. Product Safety Notice: Some electrical and mechanical parts have special safety-related characteristics which might not be obvious from visual inspection. These safety features and the protection they give might be lost if the replacement component differs from the original--even if the replacement is rated for higher voltage, wattage, etc.
- 10 Components that are critical for safety are indicated in the circuit diagram by shading,  or  . Use replacement components that have the same ratings, especially for flame resistance and dielectric strength specifications. A replacement part that does not have the same safety characteristics as the original might create shock, fire or other hazards.

## 1-2 Servicing Precautions

---

**Warning1:** First read the "Safety Precautions" section of this manual. If some unforeseen circumstance creates a conflict between the servicing and safety precautions, always follow the safety precautions.

1. Servicing precautions are printed on the cabinet. Follow them.
2. Always unplug the unit's AC power cord from the AC power source before attempting to: (a) Remove or reinstall any component or assembly, (b) Disconnect an electrical plug or connector, (c) Connect a test component in parallel with an electrolytic capacitor.
3. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring may be clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
4. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the portion around the serviced part has not been damaged.
5. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
6. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500V) to the blades of the AC plug.  
  
The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
7. Never defeat any of the B+ voltage interlocks. Do not apply AC power to the unit (or any of its assemblies) unless all solid-state heat sinks are correctly installed.
8. Always connect a test instrument's ground lead to the instrument chassis ground *before* connecting the positive lead; always remove the instrument's ground lead last.

## 1-3 Precautions for Electrostatically Sensitive Devices (ESDs)

1. Some semiconductor ("solid state") devices are easily damaged by static electricity. Such components are called Electrostatically Sensitive Devices (ESDs). Examples include integrated circuits and some field-effect transistors. The following techniques will reduce the occurrence of component damage caused by static electricity.
2. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. (Be sure to remove it prior to applying power--this is an electric shock precaution.)
3. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of electrostatic charge.
4. Do not use freon-propelled chemicals. These can generate electrical charges that damage ESDs.
5. Use only a grounded-tip soldering iron when soldering or unsoldering ESDs.
6. Use only an anti-static solder removal device. Many solder removal devices are not rated as "anti-static" (these can accumulate sufficient electrical charge to damage ESDs).
7. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
8. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.
9. Minimize body motions when handing unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting a foot from a carpeted floor can generate enough static electricity to damage an ESD.

## 1-4 Special Precautions and Warning Labels for Laser Products

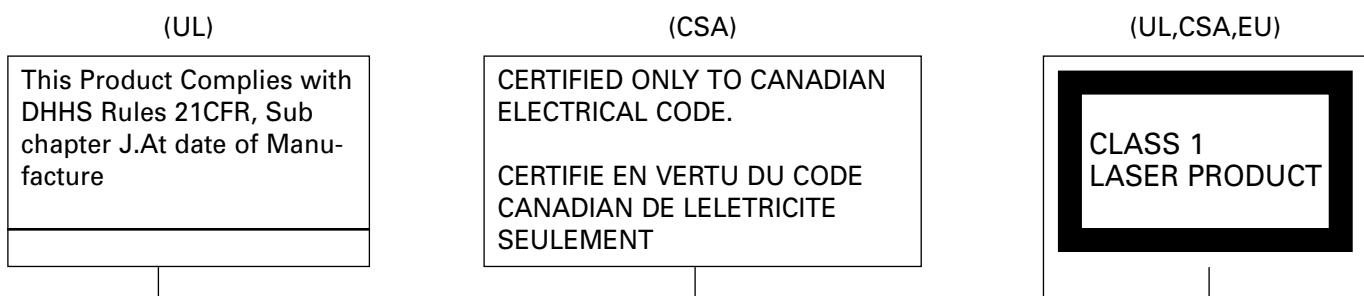

Fig. 1-3 Warning Labels (Location: Enclosure Block)

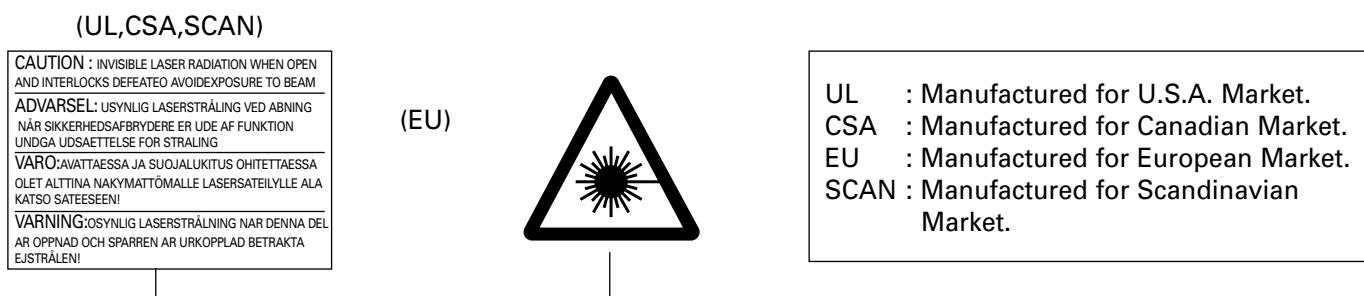

Fig. 1-4 Warning Labels (Location: Disc Clamper, Inner Side of Unit Door or Nearby Unit Chassis )

## 1-4 Special Precautions and Warning Labels for Laser Products (Continued)

### 1-4-1 Warnings

- When servicing, do not approach the LASER exit with the eye too closely. In case it is necessary to confirm LASER beam emission, be sure to observe from a distance of more than 30 cm from the surface of the objective lens on the optical pick-up block.
- Do not attempt to handle the objective lens when the DISC is not on the tray.

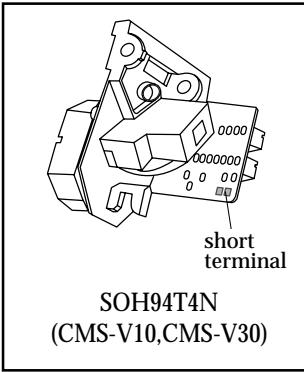

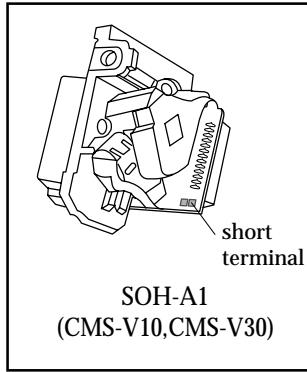

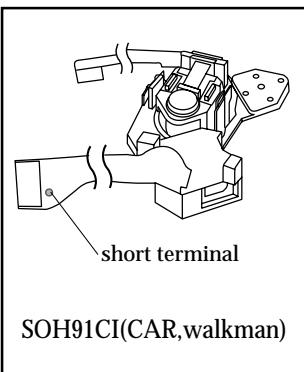

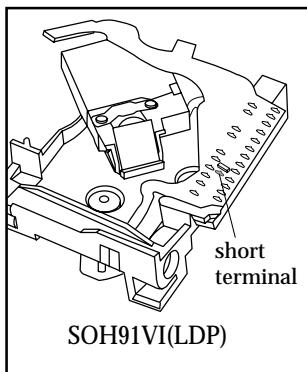

### 1-4-2 Laser Diode Specifications

Material: GaAs+ GaAlAs

Wavelength: 760-800 nm

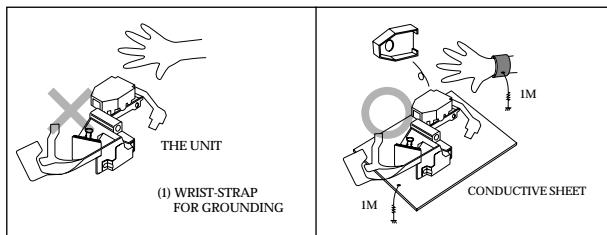

Emission Duration: Continuous

Laser Output: 0.2 mw (measured at a 1.6 mm distance from the objective lens surface on the optical pick-up block.)

### 1-4-3 Handling the Optical Pick-up

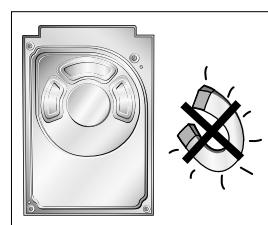

- Static electricity from clothing or the body may cause electrostatic breakdown of the laser diode in the Optical Pickup. Follow this procedure:
- Place a conductive sheet on the work bench (i.e., the black sheet used for wrapping repair parts.) Note: The surface of the work bench should be covered by a copper ground plane, which is grounded.
- The repair technician must wear a wrist strap which is grounded to the copper sheet.
- To remove the Optical Pickup block: Place the set on the conductive sheet, and momentarily touch the conductive sheet with both hands. (While working, do not allow any electrostatic sources--such as clothes--to touch the unit.)
- Ground the "Short Terminal" (located on the PCB, inside the Pickup Assembly) before replacing the Pickup. This terminal should be shorted whenever the Pickup Assembly is lifted or moved.
- After replacing the Pickup, reopen the Short Terminal. See diagrams below:

## 1-5 Special Precautions for HDD

### \* HDD Data Maintenance Step

- Since the data on the HDD is weak to mechanical shock, place the HDD in a safe location that is free from mechanical shock once it is removed from the main unit.
- In order to safe keep the data on the HDD, back up the data before the repair or make sure not to place the HDD near any electrical appliance that generates a strong magnetic field.

## 2. Product Description

### 1. Specifications

#### RADIO

##### SW(OPTION)

Usable sensitivity 40 dB

##### AM (MW)

Signal/noise ratio 40 dB

Usable sensitivity 60 dB

Total harmonic distortion 2 %

##### FM

Signal/noise ratio 55 dB

Usable sensitivity 10 dB

Total harmonic distortion 0.6 %

#### COMPACT DISC PLAYER

Capacity 3 discs

Frequency range 20 Hz - 20 KHz ( $\pm 1$  dB)

Signal/noise ratio 85 dB (at 1 KHz) with filter

Distortion 0.05 % (at 1 KHz)

Channel separation 75 dB

Disc sizes Diameter: 120 or 80 mm. Thickness: 1.2 mm

#### TAPE DECK

Frequency range 125 Hz ~ 10 KHz

Signal/noise ratio 40 dB

Channel separation 30 dB

Erasing effect 50 dB(without filter)

#### AMPLIFIER

Output power

Speaker(6 Ω) 130 Watts/CH RMS,IEC (total harmonic distortion: 10 %)

Channel separation 40 dB

Signal/noise ratio 75 dB

#### GENERAL

Dimensions 270 (D) x 332 (H) x 426 (W) mm

## 2. Notes on discs

---

### Disc Recording Format

#### CD-R Discs

- Some CD-R discs may not be playable depending on the disc recording device (CD-Recorder or PC) and the condition of the disc.
- Use a 650MB/74 minute CD-R disc.  
Do not use CD-R disk over 700MB/80 minute as much as possible since it may not be played back.
- Some CD-RW (Rewritable) media, may not be playable.
- Only CD-Rs that are properly "closed" can be fully played. If the session is closed but the disc is left open, you may not be able to fully play the disc.

#### CD-R MP3 Discs

- Only CD-R discs with MP3 files in ISO 9660 or Joliet format can be played.
- MP3 file names should be 8 characters or less in length and contain no blank spaces or special characters (. / = +).
- Use discs recorded with a compression/decompression data rate greater than 128Kbps.
- Only files with the ".mp3" and ".MP3" extensions can be played.
- Only a consecutively written Multisession disc can be played. If there is a blank segment in the Multisession disc, the disc can be played only up to the blank segment.
- If the disc is not closed, it will take longer to begin playback and not all of the recorded files may be played.
- For files encoded in Variable Bit Rate (VBR) format, i.e. files encoded in both low bit rate and high bit rate (e.g., 32Kbps ~ 320Kbps), the sound may skip during playback.
- A maximum of 500 tracks can be played per CD.
- A maximum of 300 folders can be played per CD.

#### CD-R JPEG Discs

- Only files with the ".jpeg" and ".JPEG" extensions can be played.
- If the disc is not closed, it will take longer to start playing and not all of the recorded files may be played.
- Only CD-R discs with JPEG files in ISO 9660 or Joliet format can be played.
- JPEG file names should be 8 characters or less in length and contain no blank spaces or special characters (. / = +).
- Only a consecutively written multisession disc can be played. If there is a blank segment in the multisession disc, the disc can be played only up to the blank segment.
- A maximum of 9,999 images can be stored on a single CD.
- When playing a Kodak/Fuji Picture CD, only the JPEG files in the picture folder can be played.
- Picture discs other than Kodak/Fuji Picture CDs may take longer to start playing or may not play at all.

### **3. Accessories**

---

<b>Code no.</b>	<b>Description &amp; Specification</b>	<b>Remarks</b>
AH39-00320C	CBF COAXIAL CABLE	110REC,1007#

AH42-00019A	ANT LOOP	S0160BL-16,9uH,-,1KH
AH59-01159S	REMOCON-ASSY	SAMSUNG,--,28KEY

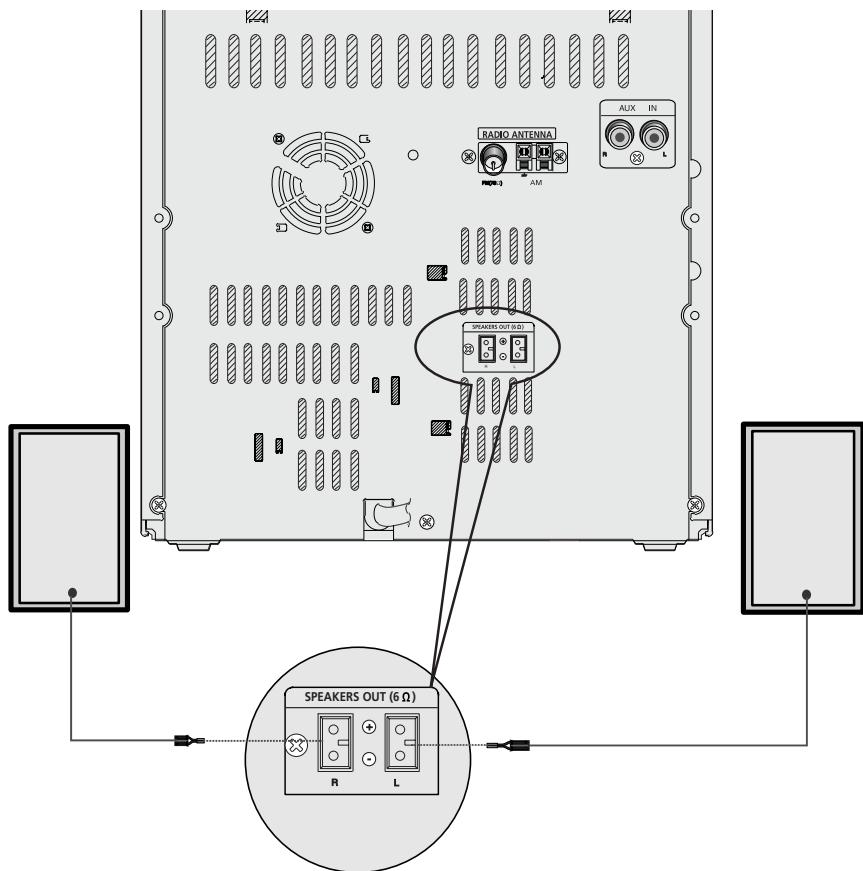

### 3. Product Functions

#### 1. SPK connection

##### Connecting the Loudspeakers

Connect the connecting jacks (2) to the back of mini-compact system.

- ◆ Make sure the polarities (+and -) are correct.
- ◆ Left speaker wire should be connected to mark "L" of the unit back.  
Right speaker wire should be connected to mark "R" of the unit back.

##### Directions in Installing Speaker

- ◆ Installation in a place near heating apparatus, under direct lay of light or with high humidity may cause performance degradation of the speaker.
- ◆ Do not install on the wall or on a high place of pole or other unstable place to prevent any safety accident caused by falling of the speaker.
- ◆ Do not take the speaker apart from TV or computer monitor.  
The speaker near the TV or computer monitor may influence the quality of the screen display.

## 2. Main Functions

### Loading and Changing Compact Discs

The CD disc changer can contain up to three 12 cm or 8 cm compact discs without using an adapter.

- Never force the compact disc carrousel when opening and closing the compartment.
- Never press down or place objects on the carrousel.
- Always treat your compact discs with care; refer, if necessary, to the section entitled "Precautions When Using Compact Discs" on page 24 .

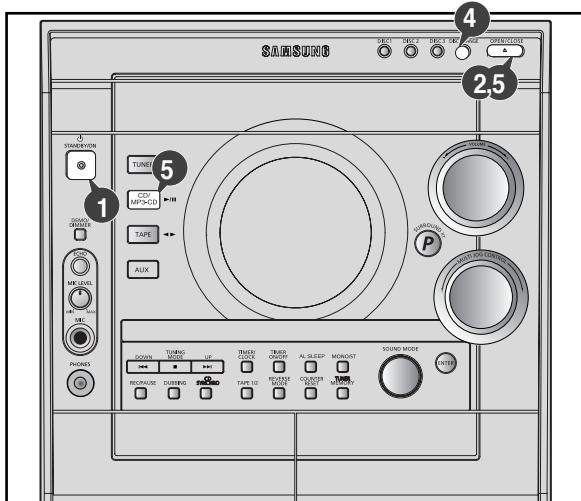

- 1 Switch the system on by pressing STANDBY/ON.
- 2 Press the OPEN/CLOSE(▲) button on the front panel.  
Result: The compartment opens.
- 3 Place one discs in the front slots of the carrousel, with the label on the discs facing upwards.  
➤ Check that the compact disc has been correctly inserted in the holder before closing the compartment.
- 4 If you wish to load another compact disc, press the DISC CHANGE button on the front panel (or DISC SKIP on the remote control).  
Result: The carrousel rotates by 120°.
- 5 Close the compartment by pressing the OPEN/CLOSE(▲) button again.  
➤ If you wish to start playing a disc directly, you can also proceed as follows.

To play...	Press...
Disc 1	CD (▶/II) or Disc 1
Disc 2	Disc 2
Disc 3	Disc 3

Result: The compartment closes automatically and the disc selected starts playing.

- 6 To change or unload the compact disc changer, repeat Steps 2 to 5.

- Keep the compartment closed whenever you are not using it, to prevent dust from entering.
- You can load or unload compact discs when the radio, tape or auxiliary source function is selected.

### To replay the CD/MP3-CD

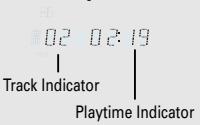

This is a player that enables the playback of audio CD, CD-R, CD-RW and MP3-CD and does not possess the function that saves MP3 files.

Do not use CDs of irregular shapes like heart or octagon shapes. The performance of the player may be degraded.

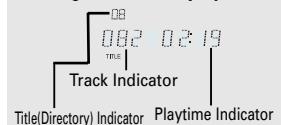

At least more than one CD should be inserted for playbacks.

- 1 Press the STANDBY/ON button to switch on the power.
- 2 Press the CD/MP3-CD(▶/II) of the main unit to select the CD function.
- 3 Insert more than one CD or a MP3-CD.
- 4 Press the CD/MP3-CD(▶/II) button of the main unit or the ▶/II button of the remote control.
  - ◆ If there are more than one CD or an MP3-CD inserted, replays are then processed in order.
  - ◆ Your CD Player will take a few moments to scan through all the tracks recorded on a particular MP3-CD.
  - ◆ The English name of the song may be indicated on the display only if directly downloaded from the PC or if the purchased MP3-CD is sorted according to titles(directory). (Other languages besides English may not be indicated.)
  - ◆ The English name of the track may not be indicated depending on the characteristics of the MP3-CD.

#### <CD Playback>

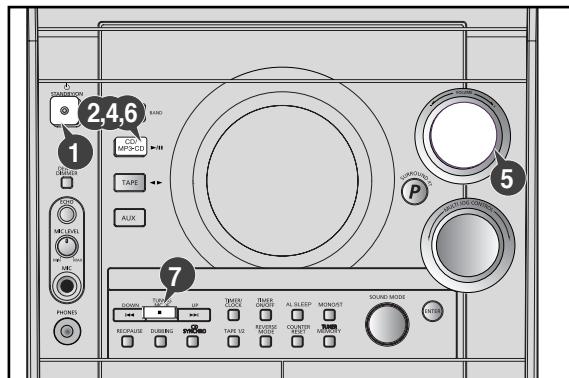

#### <During the MP3-CD playback>

- 5 Adjust the volume according to needs with the following procedures.
  - ◆ Turn the VOLUME control of the main unit.
  - or
  - ◆ Press the VOLUME + or - button of the remote control.
  - The volume level can be adjust in 31 steps(VOL MIN,VOL 1-VOL 29, and VOL MAX).
- 6 If it is desired to pause while the playback is processing, press the CD/MP3-CD(▶/II) button.
  - Press the CD/MP3-CD(▶/II) button once again to playback again.

- 7 To stop playback, press the ■ button.

- ◆ A new disc may be inserted in the remaining two compartments excluding the CD which is being played back. Press the Disc Changer button to open the CD tray. The revolving part does not turn during playbacks.
- ◆ If there is not even one CD inserted in the CD tray, it is indicated as "NO DISC".
- ◆ If the CD Repeat function is not selected, 3 CDs are played back which automatically stops.

## Repeating One or All Tracks on the Compact Discs

### You can repeat indefinitely:

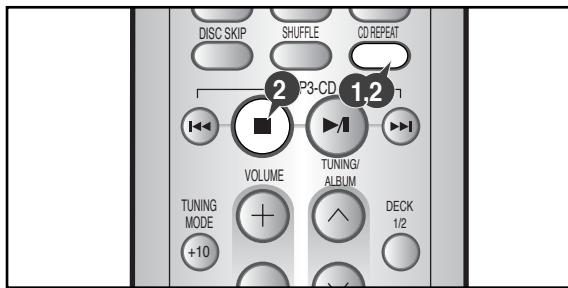

- ◆ A specific track on a compact disc.
- ◆ All tracks on the compact disc selected.
- ◆ All discs loaded in the carousel

### 1 To repeat...

Press CD REPEAT on the Remote Control or more times until...

- The current track indefinitely ..... REPEAT 1 is displayed  
 The selected disc ..... REPEAT 1 CD is displayed  
 All discs loaded ..... REPEAT ALL CD is displayed

### 2 When you wish to stop the Repeat function, press CD REPEAT until ALL CD or 1 CD is displayed, or press ■ .

## Medley Play

(This function is only available during playback of a CD.)

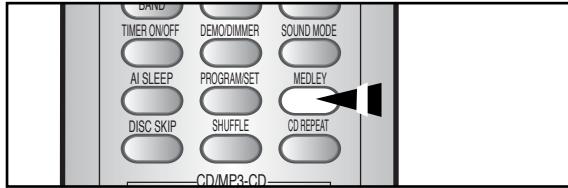

You can select "MEDLEY ON" and "MEDLEY OFF" during playback of a CD.

### 1 Press the MEDLEY PLAY button once.

- Result: "MEDLEY" is displayed.  
 ◆ The interval time between the tracks can be shorten.

### 2 Press the MEDLEY PLAY button again.

- ◆ Cancel this function, return to normal playback.

## Function to skip through 10 tracks at a time

Press the +10 button briefly while playing back a CD and MP3-CD. The track 10 tracks after the current one will then be played back.

**Example:** If you want to select track 43 during playback of track 5, press the +10 button four times, and then press the ►► button three times .

5 → 10 → 20 → 30 → 40 → 41 → 42 → 43

## Last Memory Function

(This function is only available during playback of MP3-CD.)

When MP3-CD playback is selected again after your CD player has been stopped or turned off, this function allows playback from the start of the track that you last listened to.

- ◆ Press the PROGRAM button while your MP3-CD is being played . The LAST ON and LAST OFF may be repeatedly selected.

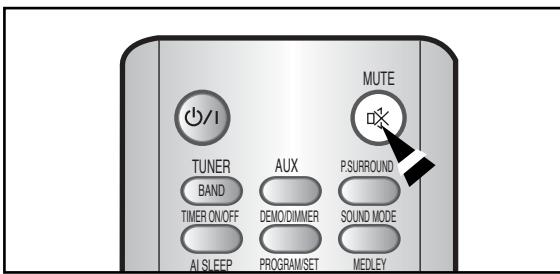

### 3. New Functions

#### Mute Function

You can turn the sound off temporarily on your system.  
**Example:** You wish to answer a telephone call.

- 1 Press MUTE.
- 2 To switch the sound back on (at the same volume as before), press MUTE again or the VOLUME buttons.

#### Selecting Sound Mode

Your mini-compact system is equipped with a preset equalizer that allows you to choose the most appropriate balance between treble and bass frequencies, according to the type of music you are listening to.

This model provides D.S.P modes so that you can enjoy virtually original sound.

Turn SOUND MODE on the front panel or Press SOUND MODE on the remote control until the required option is selected.

To obtain a...	Select...
Normal balance (linear)	PASS
Balance suitable for pop music	POP
Balance suitable for rock music	ROCK
Balance suitable for classic music	CLASSIC
Balance suitable for hall	HALL
Balance suitable for live	LIVE
Balance suitable for cinema	CINEMA

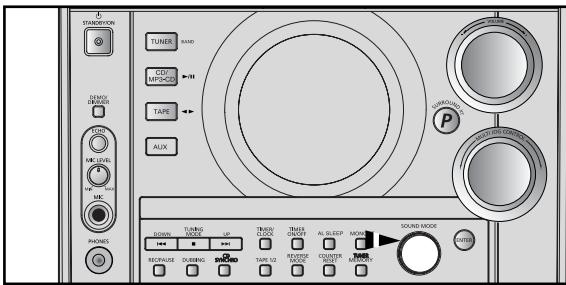

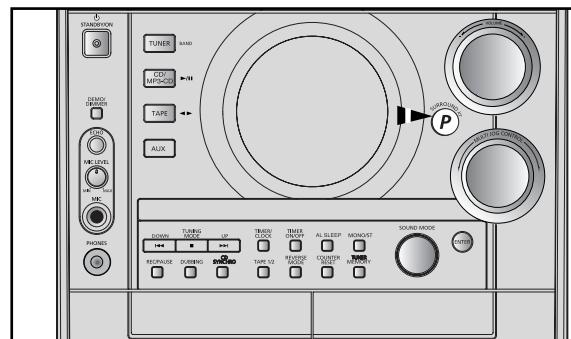

#### Power Surround/Power Surround XT/Power Sound Function

Your mini-compact system is equipped with the function of Power Surround/Power Surround XT/Power Sound.

The Power Surround replaces conventional stereo sound with a wider and more true-to-life sound. It creates the feeling of being right at the centre of the music and being surrounded by total music sound. The function of Power Sound amplifies bass and improves high key or bass twice as much for you to appreciate powerful real sound.

➤ Press SURROUND XT button on the front panel until the required option is selected. Each time the SURROUND XT button is pressed, "P,SOUND,P,SUR,P,SUR, XT ,OFF" is selected or cancelled in this order.

➤ The P. SURROUND function is not available if plugging the Microphone into MIC jack.

## 4. Adjustments

### Cassette Deck

#### 1. To Adjust Tape Speed

Notes

- 1) Measuring tape: i) MTT-111 (or equivalent)  
(Tapes recorded with 3kHz)  
ii) MTT-5512 (or equivalent)
- 2) Connect the SPK OUT of the MAIN PCB to the frequency counter as in figure 1-5.

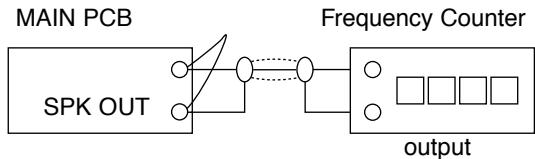

Figure 1-5

Step	Item	Pre-Setup Condition	Pre-Setup	To Adjust	Standard	Remark
1	NOR SPEED Control	SPK OUT (connected to the frequency counter)	1) Deck :MTT-111 2) Press PLAY SW button	Fixed	3KHz	±1% range

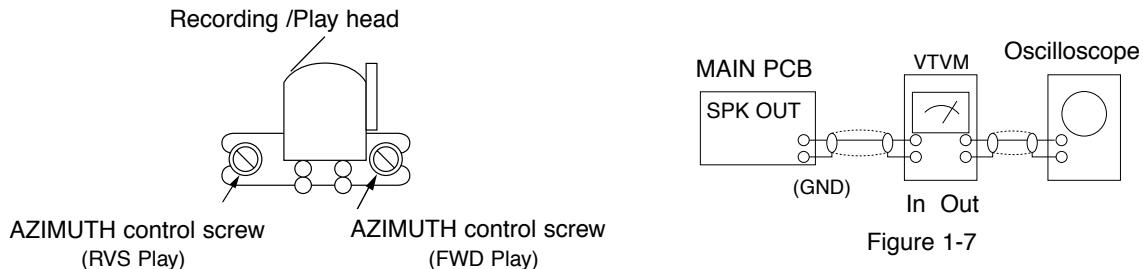

Figure 1-6

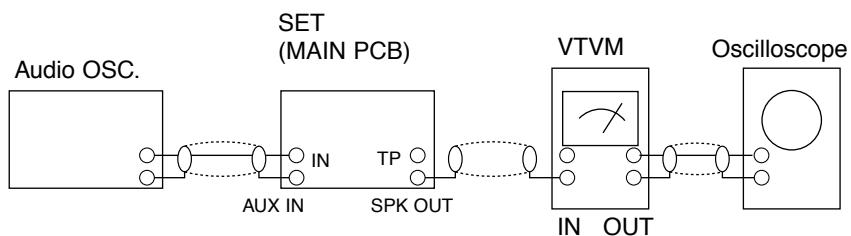

Figure 1-8

## 2. To Adjust PlayBack Level/REC

Notes

- 1) Before the actual adjustment, clean the play/recording head.
- 2) Measuring tape :
  - i) MTT-114N(or equivalent 10kHz AZIMUTH control)
  - ii) MTT-5512
- 3) The cassette deck is connections as shown in figure 1-7.

### 1. Adjust Deck 1 Play Level

Step	Item	Pre-Setup Condition	Pre-Setup	To Adjust	Standard	Remark
1	AZIMUTH	SPK OUT (VTVM is connected to the scope)	After putting MTT-114N into Deck 1 - Press FWD PLAY button.	- Turn the control screw to as shown in Figure 1-6.	Max output and same phase (both channels)	After adjustment secure it with REGION LOCK.

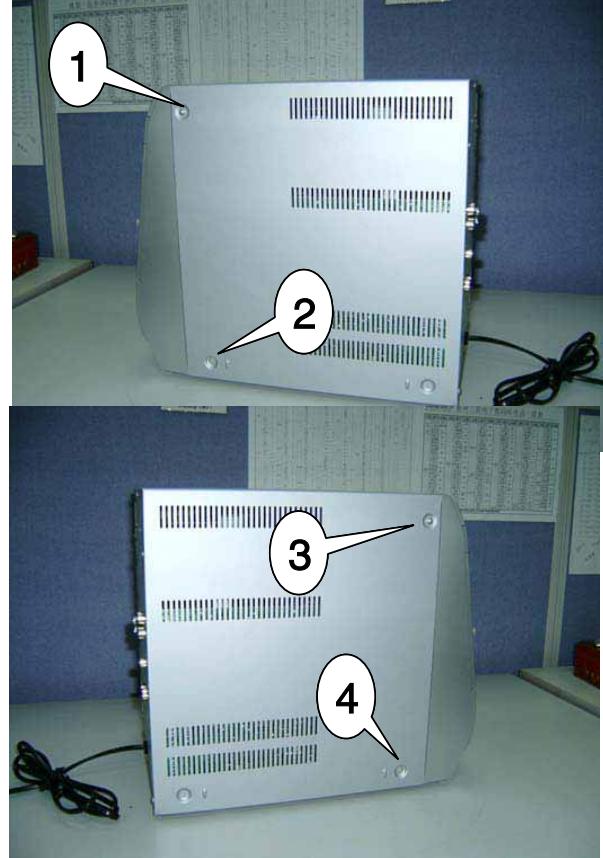

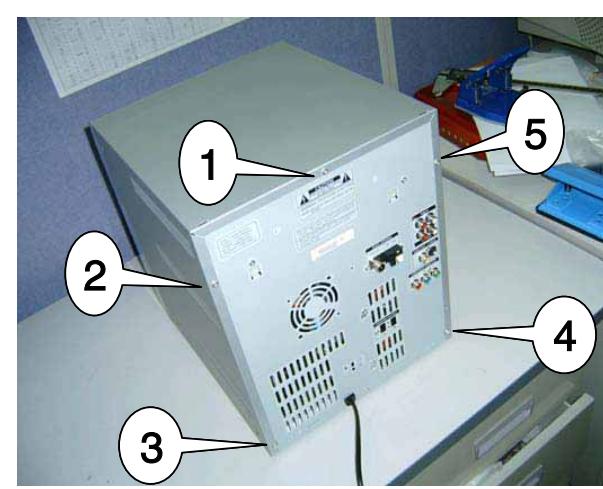

### 2. Adjust Deck 2 Play Level/ REC BIAS

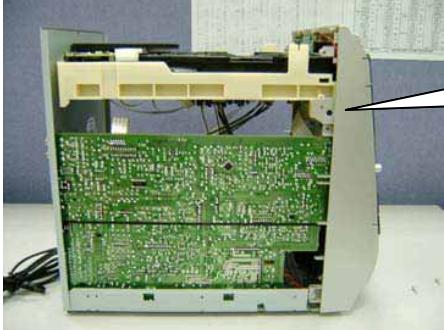

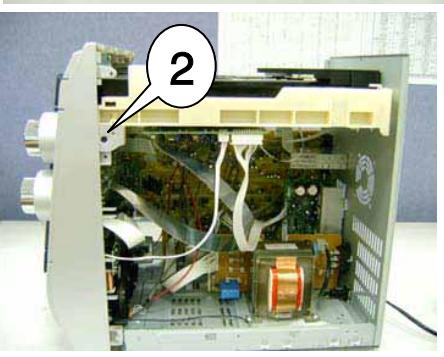

Step	Item	Pre-Setup Condition	Pre-Setup	To Adjust	Standard	Remark
1	AZIMUTH	SPK OUT (VTVM is connected to the scope)	After putting MTT-114N into Deck 2 - Press FWD PLAY button.	- Turn the control screw to as shown in Figure 1-6.	MAX OUTPUT and same phase (both channels)	After adjustment secure it with REGION LOCK.
2	Recording Bias Voltage	Fig 1-8	After putting MTT-5512 into Deck 2 1) Press REC PLAY button. 2) TAPE PCB JCW3 ,connected to VTVM	- Turn JSP2L,JSP2R to the right and left	CHECK TO 7mV( $\pm 0.5$ mV)	

## 5. How to disassemble

### \* CAUTIONS

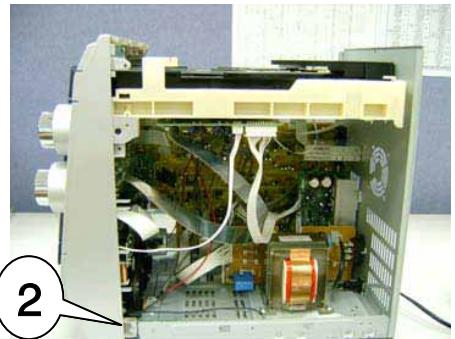

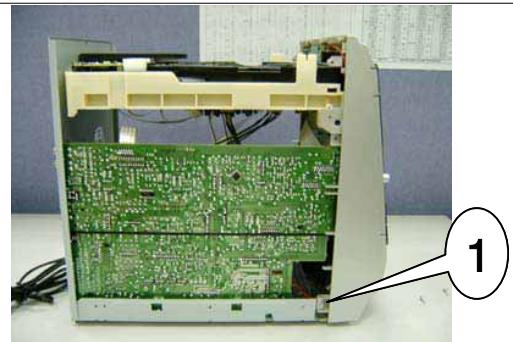

1. To avoid damage to the product, follow the disassembly method in the Service Manual.
2. As some Semiconductor devices are very sensitive to static, ensure that all procedures are adhered to when handling ESD's.

Order(Description)	Picture
<p>1.Unfasten 4 screw(1,2,3,4)on the side of <b>CABINET TOP</b>.</p> <p>*Screw 1,2,3,4 SPEC:BH 3*10 WHITE</p>	 A photograph of a silver-colored electronic cabinet. Four white screws are visible on the left side panel, each marked with a white circle containing a number: 1, 2, 3, and 4. The cabinet has a vented front panel with several horizontal slats.
<p>2.Unfasten 5 screw(1,2,3,4,5)on the side of <b>CABINET REAR</b>.</p> <p>*Screw 1,2,3,4,5 SPEC:BH 3*10 WHITE</p>	 A photograph of the rear panel of the same silver cabinet. Five white screws are visible along the left edge, each marked with a white circle containing a number: 1, 2, 3, 4, and 5. The rear panel features various ports and ventilation holes.

Order(Description)	Picture
<p>3.Unfasten 2 screw(1,2)on the side of <b>CABINET-FRONT.</b></p> <p>*Screw 1,2 SPEC:FH 3*10 BLK</p>	 
<p>4.Unfasten 2 screw(1,2)on the side of <b>CABINET REAR</b> then separate ASS'Y-CD DECK</p> <p>*Screw 1,2 SPEC:BH 3*10 WHITE</p>	 <p>2005/07/13 08:49</p>

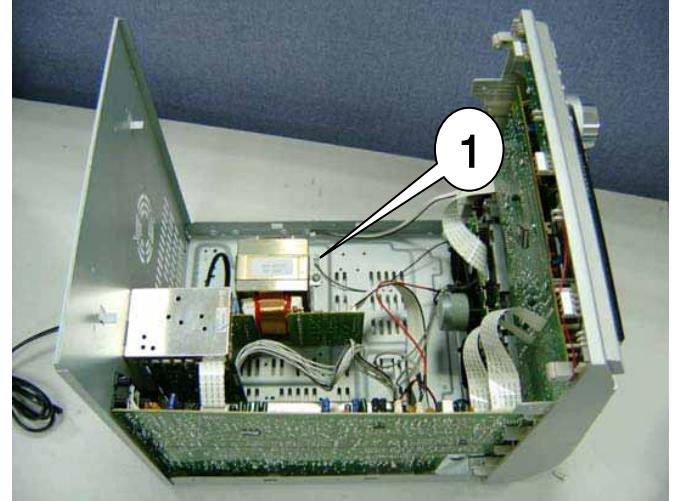

5.Unfasten 2 screw(1,2)on the side of  
**CABINET-BOTTOM.**

## Регулировка CD-механизма Samsung

Отодвинуть лоток до упора и  
нажав защелки по бокам,  
выдвигать дальше до упора

Отжимаем край лотка,  
освобождаем от упора и дальше  
выдвигаем лоток.

Переворачиваем лоток. Поворачиваем программную шестерню так, чтобы освободить коромысло из канавок шестерни. Затем выводим один край коромысла на край направляющей и приподнимая край, освобождаем из фиксации в направляющей.

Освободив и убрав  
коромысло, откручиваем  
винт крепления  
программной шестерни...

...извлекаем  
программную шестерню.

Перевернув лоток,  
освобождаем пассик от  
шкива движка....

...и снова перевернув  
лоток, извлекаем  
подпрограммную шестерню  
вместе с пассиком.

Моем, протираем канавки шкива  
движка и подпрограммной  
шестерни. Пассик обязательно  
заменить на новый, старый пассик  
будет все равно проскальзывать.

Сборка. Надев пассик на подпрограммную шестерню, просовываем пассик не задев корпуса, во избежании попадания смазки на пассик и дальнейшего его проскальзывания.

Устанавливаем  
подпрограммную шестерню на  
место, совместив по  
установочным местам....

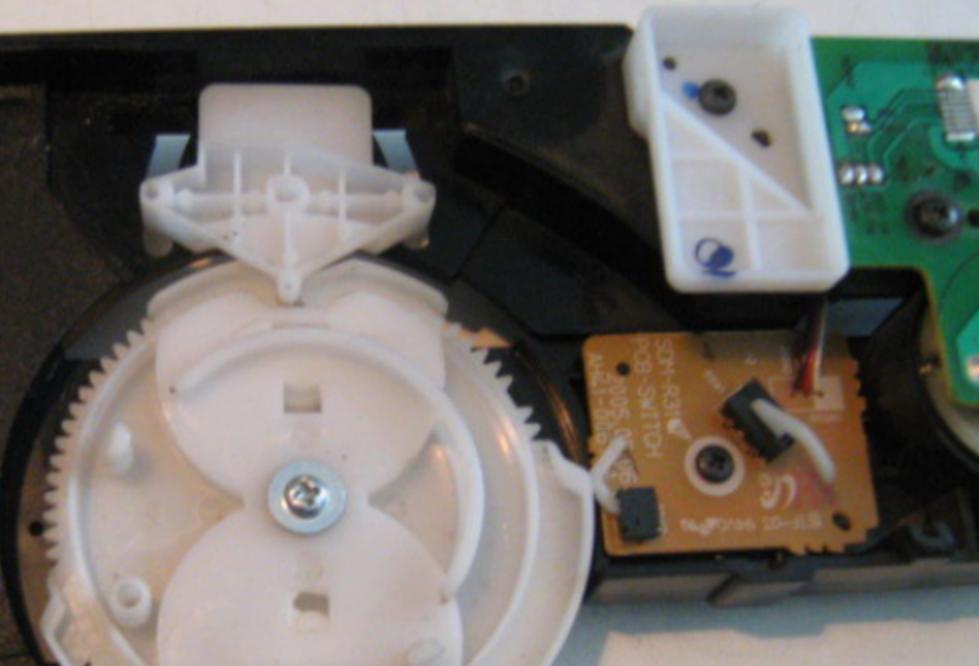

...вот так. Ошибиться  
невозможно.

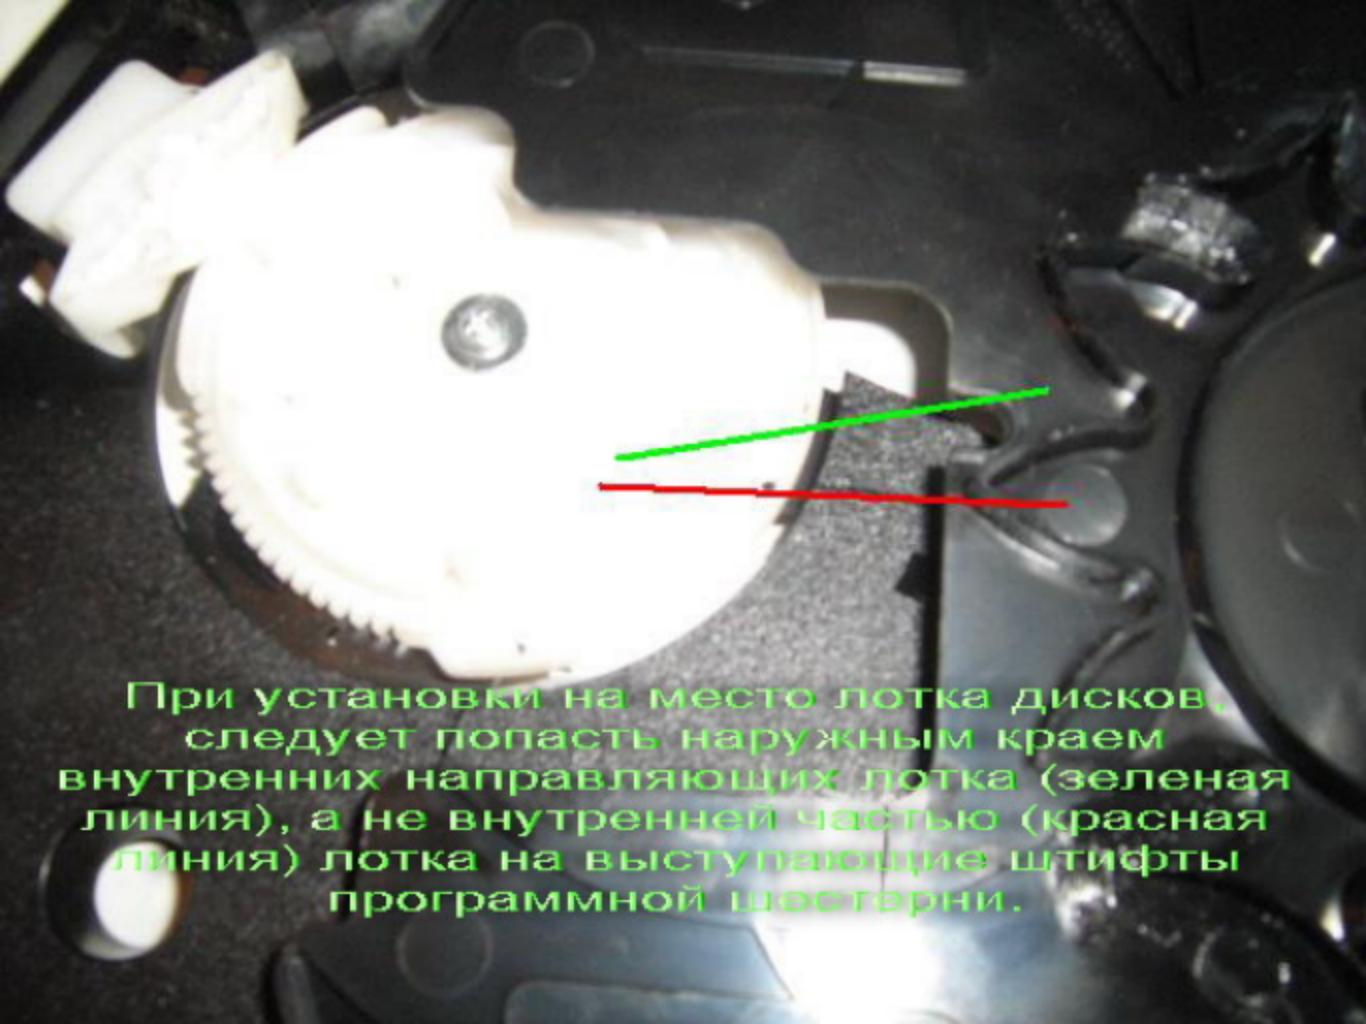

Закручиваем винт крепления подпрограммной шестерни и поворачиваем ее так, чтобы вывести зону канавок из зоны положения коромысла.

Устанавливаем коромысло  
на место в направляющие.

Поворачиваем  
подпрограммную шестерню  
так, чтобы короткая область  
канавки встала посередине  
упора коромысла.

При установки на место лотка дисков,  
следует попасть наружным краем  
внутренних направляющих лотка (зеленая  
линия), а не внутренней частью (красная  
линия) лотка на выступающие штифты  
программной шестерни.

Перед установкой  
лотка, убедитесь, что  
траверса опущена в  
нижнее положение.

Устанавливаем лоток в  
направляющие и задвигаем  
сквозь защелки до упора  
штифта.

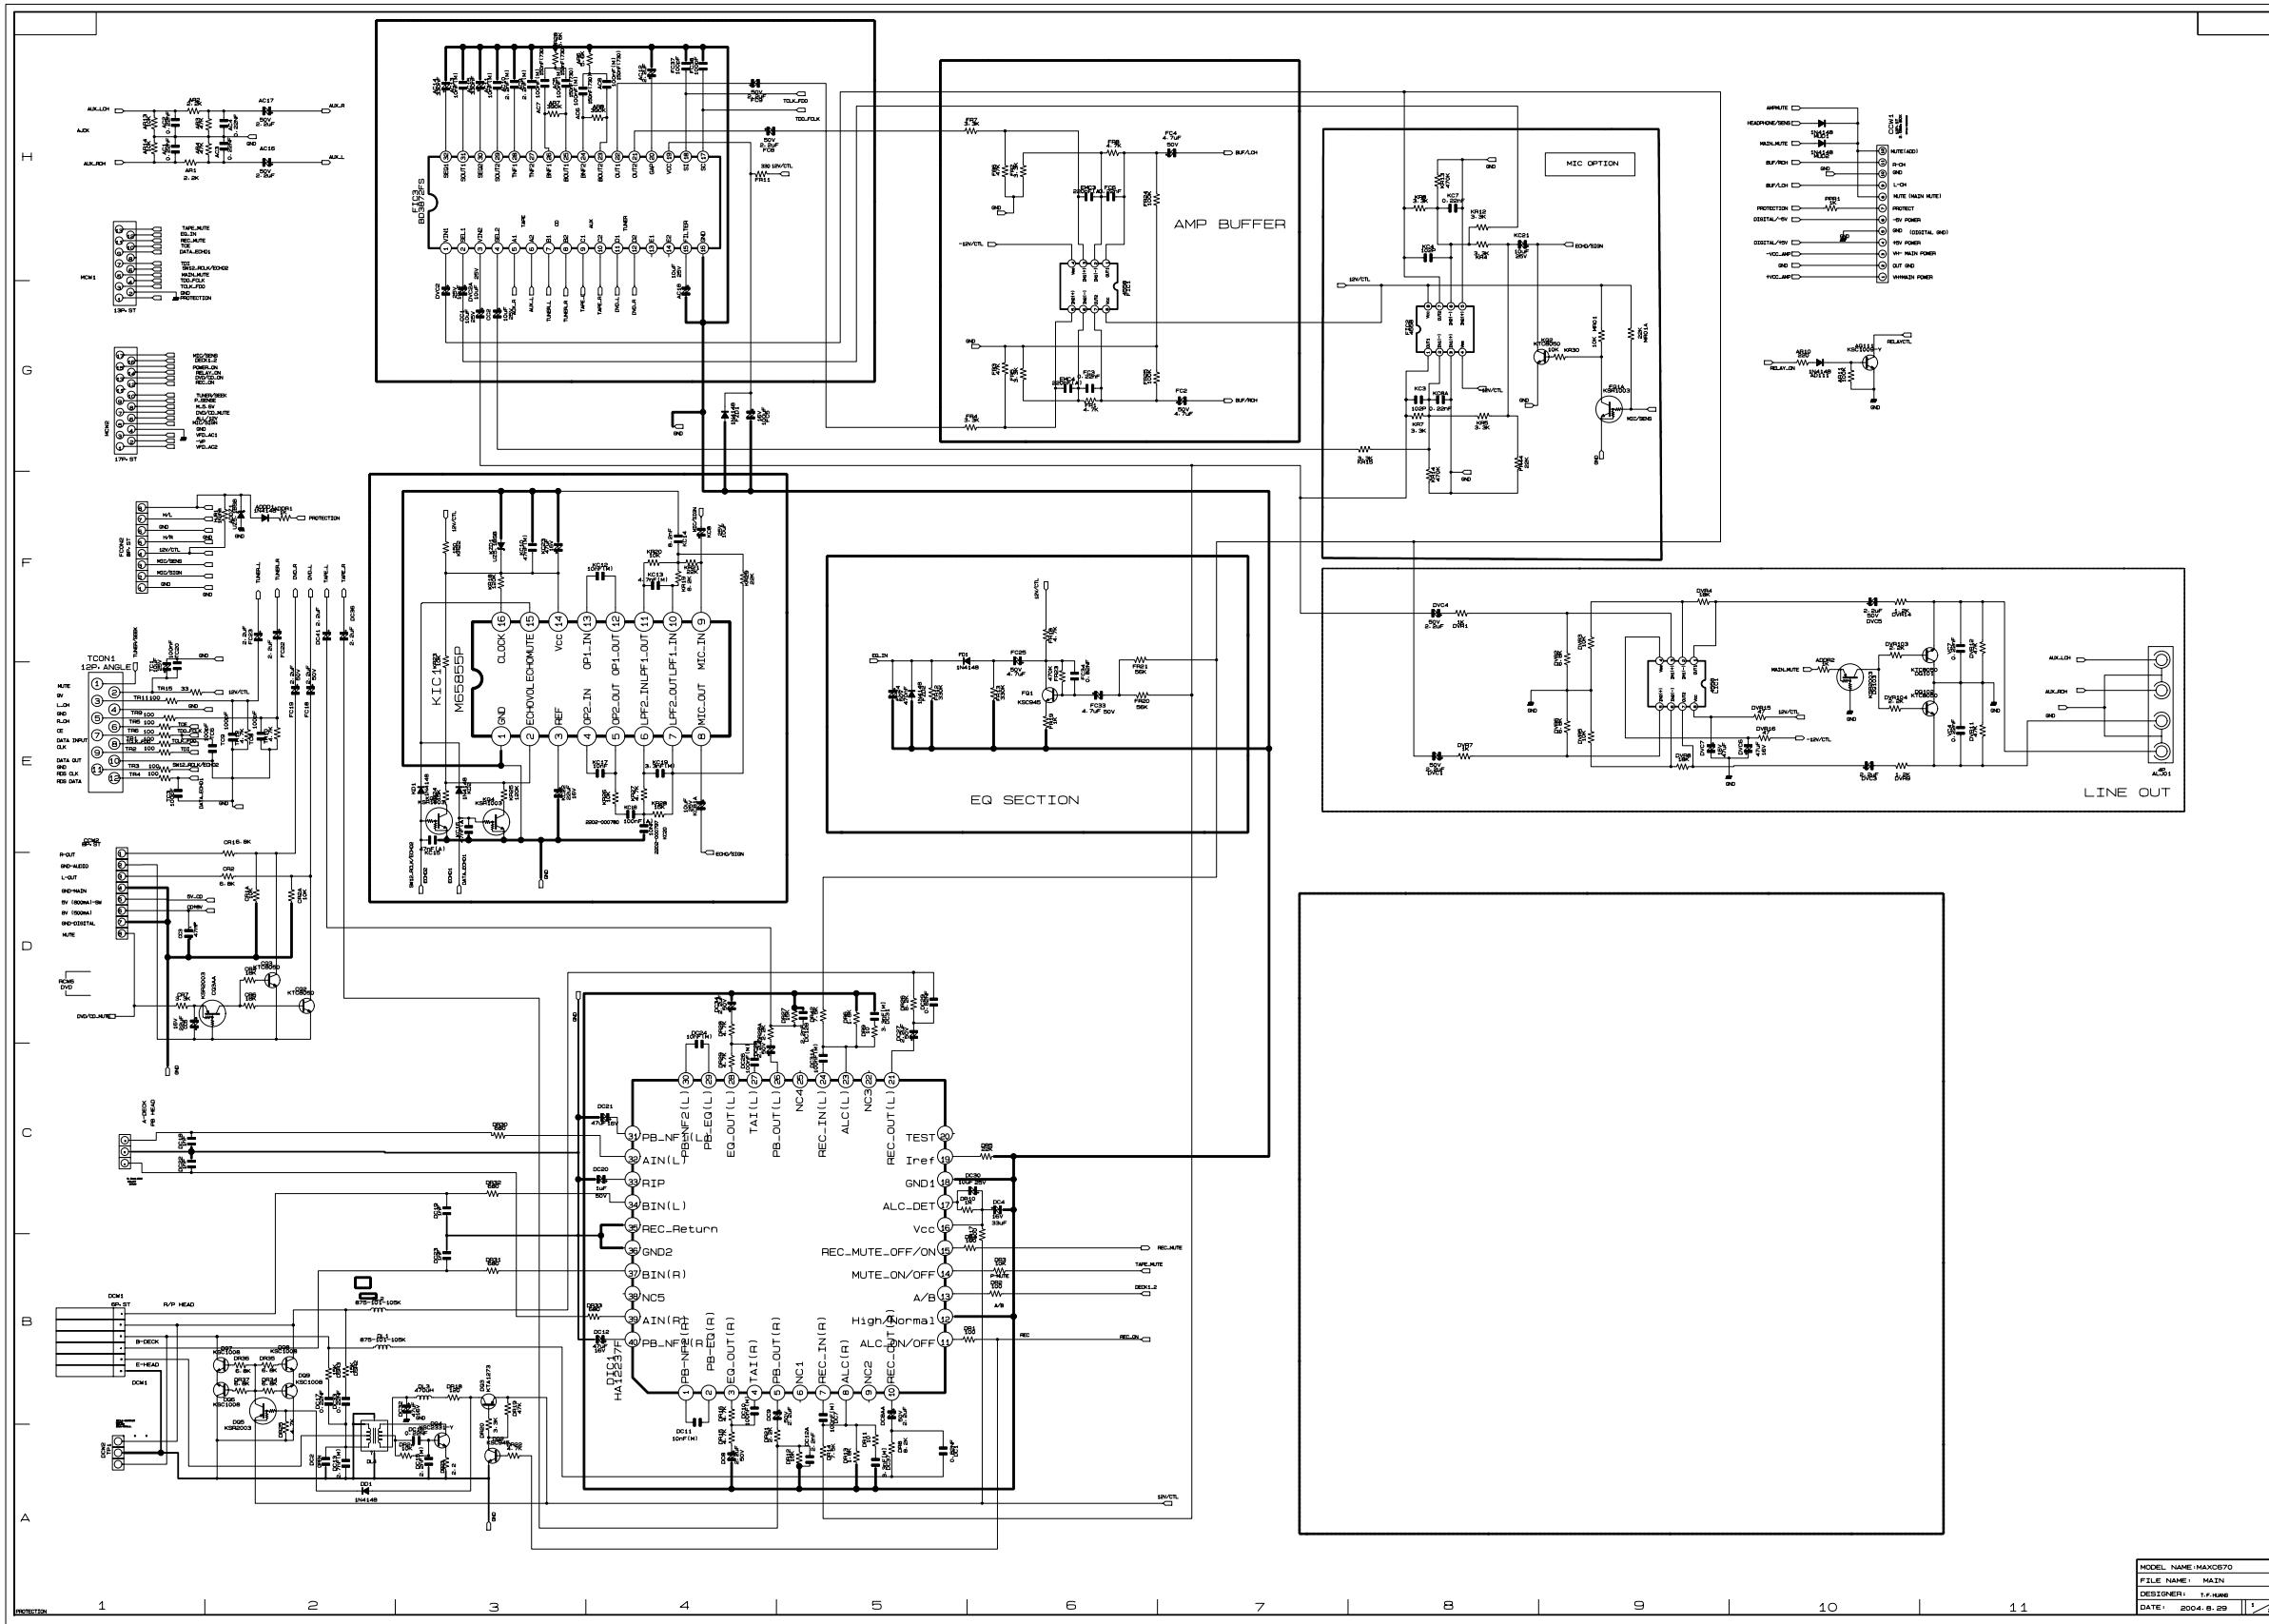

Как при разборке, отгибаем  
край лотка заводя на  
штифт и задвигаем  
дальше...

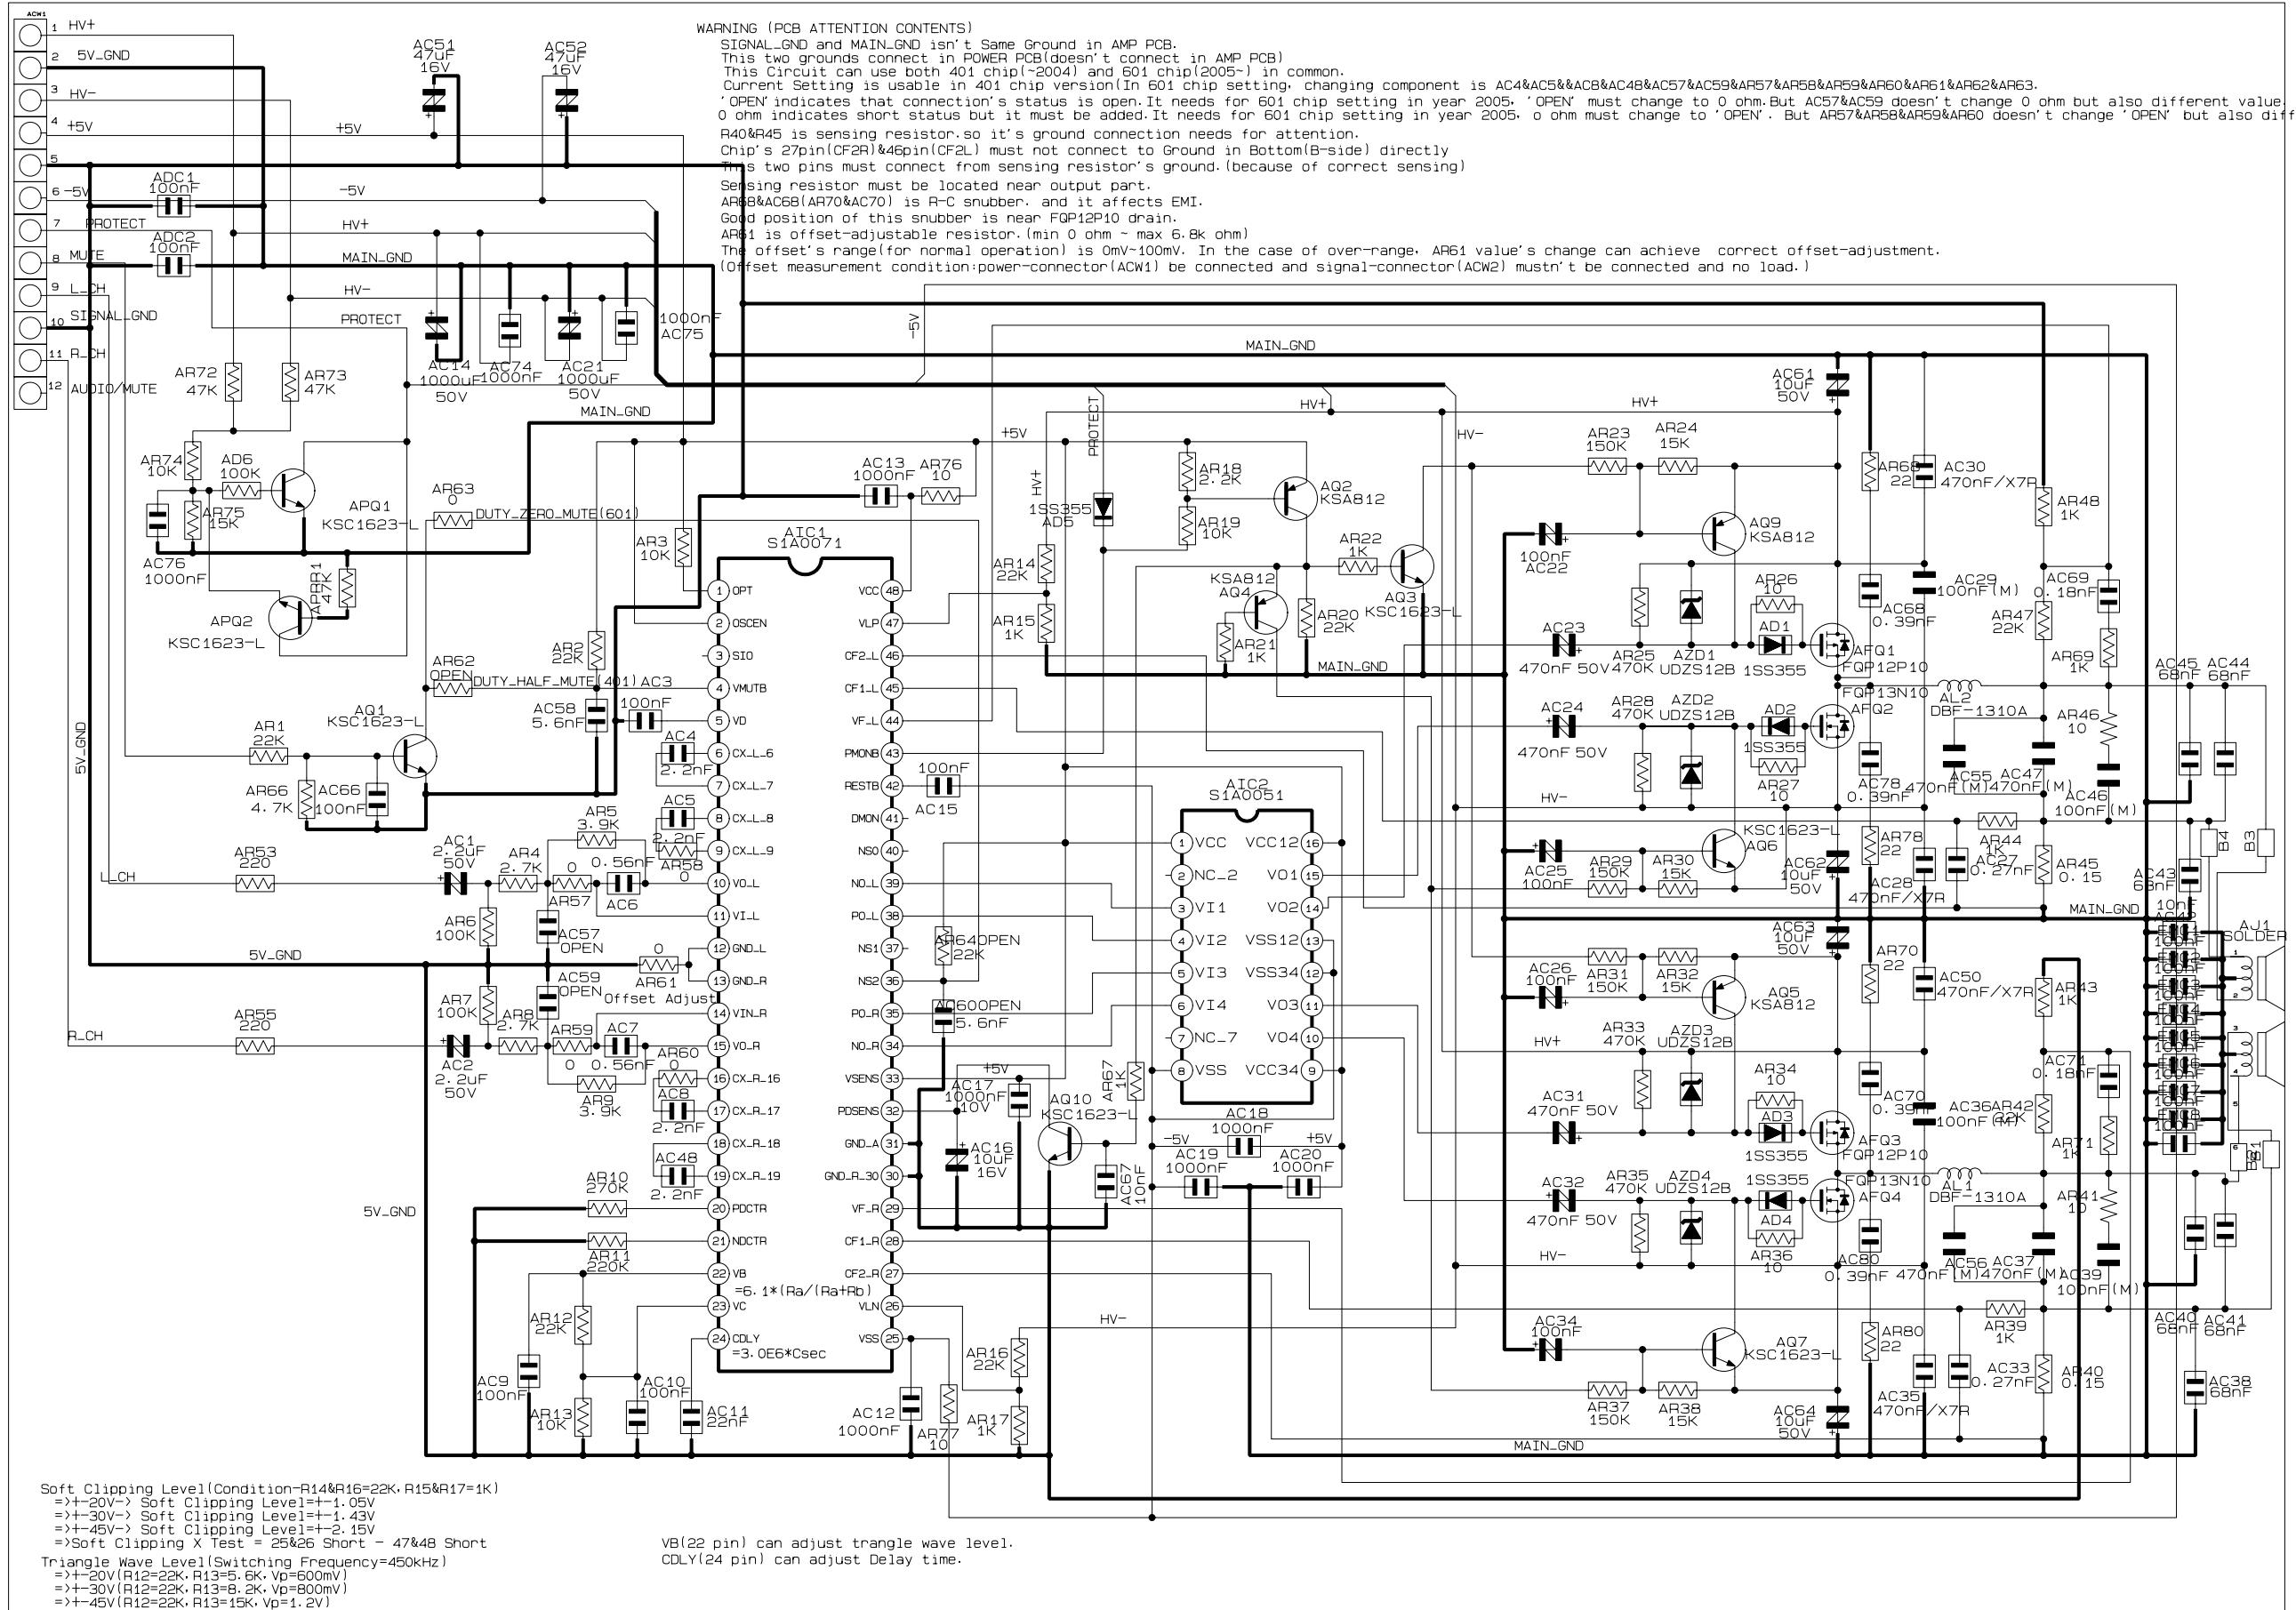

Задвигаем лоток до  
конца. Все.

## 13. Circuit Board Description

BLOCK Div.	Main roles	Remarks
MAIN PCB	<ul style="list-style-type: none"> <li>⑥ Main Operating Part           <ul style="list-style-type: none"> <li>- . Switch of four function in the function IC " BD3872FS". There are TUNER ,TAPE , DVD/VCD/CD/MP3 and AUX.</li> <li>- . ±25V voltage from power pcb retifying tube( diode) is supplied to U-COM(5.6V),±5V(Amplifier USED), the AUX,TUNER , TAPE,BD3872FS and all of OP AMPS</li> <li>- . 10V voltage from power pcb retifying tube(diode) is supplied to PIC1(KA78R05),PIC2(KA278R05)and PIC3(KA78R33)</li> <li>- . ±38V voltage from power pcb retifying tube(diode) is supplied to the amp pcb for power-end used.</li> </ul> </li>   <li>⑥ Power-sense voltage            Approve operating voltage to front for aperation on power-sense voltage while AC-CORD is inserted in outlet(stand-by)         </li> </ul>	

BLOCK Div.	Main roles	Remarks
FRONT PCB	<ul style="list-style-type: none"> <li>⑥ FRONT PCB Part           <ul style="list-style-type: none"> <li>- . Take charge of control of front panel such as REMOCON operating /main unit KEY operating / HEADPHONE / MIC operating.</li> </ul> </li> <li>⑥ OSCILLATION Circuit           <ul style="list-style-type: none"> <li>- . 10MHz Frequency oscillation circuit</li> </ul> </li> <li>⑥ VOLUME Circuit           <ul style="list-style-type: none"> <li>- . Volume change during Power-ON and dimmer on /off</li> </ul> </li> </ul>	

BLOCK Div.	Main roles	Remarks
POWER PCB	<ul style="list-style-type: none"> <li>⑥ AC POWER Supply           <ul style="list-style-type: none"> <li>- . Power cord is inserted in outlet ,the AC Voltage is supply to Power Trans throut RFS1: T3.15AL 250V (High ) or T5AL 250V(Low)</li> <li>- . ±25V Voltage is supply to MAIN PCB through rectifier circuit PPF2,PPF5</li> <li>- . 10V Voltage is supply to MAIN PCB through rectifier circuit PPF1</li> <li>- . ±38V Voltage is supply to MAIN PCB through rectifier circuit RELAY,PPF3,PPF4</li> </ul> </li> <li>⑥ Voltage to VFD           <ul style="list-style-type: none"> <li>- . Supply voltage: AC-VFD,AC-VFD and -VP to FRONT PCB VFD Display.</li> </ul> </li> </ul>	

## 14. Reference

### Cleaning Your Component System

To obtain the best possible results from your micro component system, you must clean the following elements regularly:

- ◆ The outer casing
- ◆ The compact disc player
- ◆ The cassette players (heads, rollers and drive capstans)
- ☞ Always unplug the system from the wall outlet:
  - ◆ Before cleaning it
  - ◆ If you are not going to be using it for a long time

#### Outer Casing

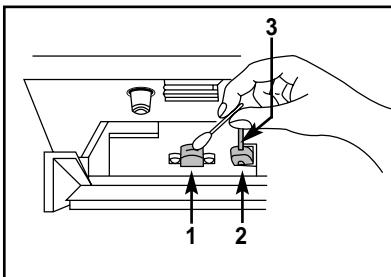

Clean the outer casing regularly using a soft cloth and a light detergent. Do not use abrasive powders, liquids or aerosol cleaners. Never let any liquids get into the system.

#### Compact Disc Player

- 1 Before playing a compact disc, clean it with a special CD cleaning agent. Do not use the same cleaning agents as for vinyl LP records. Carefully wipe the disc from the centre outward.
- 2 Regularly clean the player with a special cleaning disc (available from your local dealer).

#### Tape Decks

- 1 Press Push Eject(▲) to open the cassette deck.
- 2 Use a cotton bud and a special cassette cleaning agent to clean the:
  - ◆ Head (1)
  - ◆ Rollers (2)
  - ◆ Drive capstans (3)

- ☞ If you will not be using the remote control for a long time, remove the batteries to prevent corrosion.
- ◆ Although your system is very hard-wearing, it should not be used in an excessively dusty environment or subjected to shocks or extreme heat (close to heating appliances or in direct sunlight, etc.).
- ◆ If the unit emits an unpleasant odor when in use, unplug it from the main supply and contact the after-sales service.

### Precautions When Using Compact Discs

- ◆ Handle your compact discs with care. Always hold them by the edges to avoid leaving fingerprints on the shiny surface.
- ◆ When you have finished playing a compact disc, always put it back in its case.
- ◆ Do not fix paper or adhesive tape to the discs and do not write on the label.
- ◆ Clean them with a special-purpose cloth.
- ◆ Store your compact discs in a clean place, out of direct sunlight, where they will not be exposed to high temperatures.
- ◆ Always use compact discs marked .

### Precautions When Using Audio Cassettes

- ◆ Check that the tape in the cassette is sufficiently taut.
- ◆ To prevent erasing a cassette that you wish to keep, remove the safety tab on the upper edge of the cassette. To record a cassette, where the tab has been broken, simply cover the opening with adhesive tape.
- ◆ When you have finished playing a cassette, always put it back in its case.
- ◆ Store your cassettes in a clean place, out of direct sunlight, where they will not be exposed to high temperatures.
- ◆ Avoid using 120-minute cassettes as they place unnecessary strain on the tape mechanism.
